

# Hy-Supply XP

connection kit FL1-FL2

Professional CE – PED certified pressure  
regulator for hydrogen fuel-cells

Made in Italy

## COMPONENTS:

- Brass hydrogen CE and PED certified diaphragm pressure regulator
- 0-1.6bar analogic manometer
- **Stainless steel woven and PTFE high-pressure/temperature resistant hose (FL1)**
- **Stainless steel woven and ETFE+kevlar LOW PERMEATION high-pressure/temperature resistant hose (FL2)**
- Swagelok QC4 stem male quick connector (MyH2 compatible)
- Carbon steel nipples
- Silicon hose male connector (internal diam. 2-3mm)

Operating gas: Hydrogen

Material: Brass + stainless steel + carbon steel

Maximum input pressure: 20bar

Pressure limit: 30bar

Output pressure (adjustable): 0,2 – 1,5 bar

**Hose recommended max flow: 7l/min. (FL1) , 100l/min. (FL2)**

Maximum flow on P regulator: 600 l/min (10l/s)

Trimming and regulation: Screw on spring

Pressure regulator material: Brass

Inlet connection: 1/4" GAS

Outlet connection: 1/4" GAS

Operative T range: From -20°C to +50°C

Manometer range: 0 – 1.6 bar

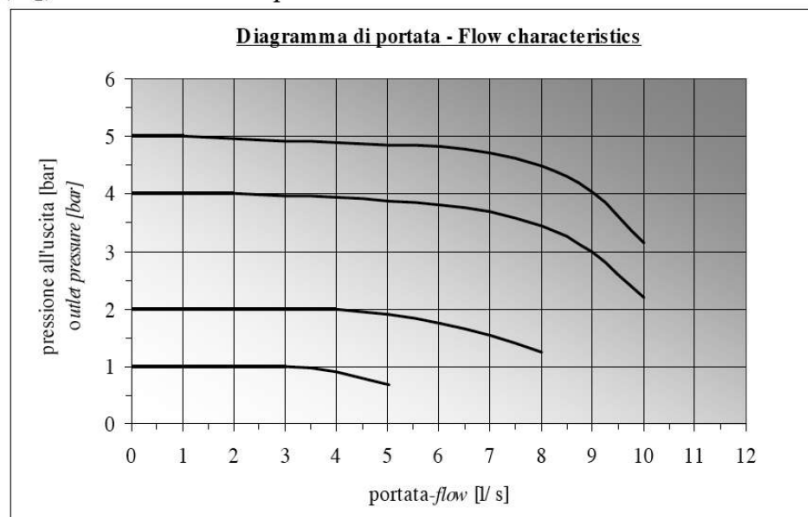

Filter (50um): Optional

Safety valve: Optional

ATEX electrovalve: Optional

*Flow characteristics obtained by free exhaust test with Nitrogen (N<sub>2</sub>) with 20 bar inlet pressure.*
